# Blockchain Development

A blockchain is a distributed database or ledger shared among a computer network's nodes. They are best known for their crucial role in cryptocurrency systems for maintaining a secure and decentralized record of transactions, but they are not limited to cryptocurrency uses. Blockchains can be used to make data in any industry immutable—the term used to describe the inability to be altered.

Because there is no way to change a block, the only trust needed is at the point where a user or program enters data. This aspect reduces the need for trusted third parties, which are usually auditors or other humans that add costs and

# NFT Marketplace

If you have an interest in cryptocurrency, art, or music, chances are you've heard of NFTs. An NFT, or non-fungible token, is a unique token recorded in a blockchain that represents ownership of a digital or physical asset. An NFT marketplace is somewhere you can buy and sell NFTs. Many NFT marketplaces exist, with a wide variety of niches and reputations. Before you begin buying NFTs or selling what you have created, it's a good idea to do your research on which blockchain platform to use.

# Director Message

This past year has been unlike any other in living memory. Amid the COVID-19 challenges, business priorities had to be redefined, with health and safety becoming the primary imperative. At the same time, ensuring business continuity to meet customer needs, and maintaining robust financial health was also vital to our sustainable long-term growth. I am happy to share that your company performed admirably on all these counts.

We took multiple initiatives for the safety of our employees, who had to adapt with agility to the new norms. From strict adherence to the COVID safety protocols at our factories and customer sites, to the development of a COVID management app, your compa-
